

How To Put Up Flyers

ALWAYS ALLOWED:

- Property you own
- Private businesses if you ask first,
e.g. bars, coffee shops, bookstores, restaurants
- Community message boards
(community center, supermarkets, laundromats, libraries)

GENERALLY OK:

- Sidewalks! Tape stuff to the ground!
- Car windshields
- Hand them out in public spaces

USE GOOD JUDGEMENT:

- Telephone poles, street lights, lampposts
- The back of street signs

NOT OKAY:

- Don't ever touch mailboxes
(this is a federal crime)
- Private property you don't own
- Schools, unless you go there

Stickers

(all above still applies)

- Give them to your friends!

NOT OKAY

- Cars that aren't yours

Print stickers &
flyers you find
online or make
your own!

Why ??

It's time to bring these messages to
the real world. EVERYWHERE.

Movements gain power when they're
visible. You can make this happen.

General Advice

- appear friendly and non-threatening
- comply with requests from business
owners or police to take them down
- post next to other flyers / stickers!
- no damage -- use tape, not staples!
- watch out for cameras & police
- walk or bike, or park a few streets away
- if advertising an event on a specific
day, take them down afterwards

If in doubt, look up your local laws. In some areas, putting flyers on telephone poles or car windshields is technically not allowed, but many people do it anyway for lost pets, yard sales, etc. Use your best judgement. This is a time to be brave and smart.

Remember, Thomas Paine got the American Revolution started with pamphlets.

FOR THE PEOPLE ... BY THE PEOPLE
